

## Digging Tools

### Heavy Shoe Tamping Bar

This tamp bar has wood, rounded handles that measure 1 5/8" in diameter. The head is faces with a heavy steel shoe measuring 1/2" in thickness. The size of the tamping face is 1 1/4" wide by 3 1/2" long. This tamping bar is well balanced and very efficient.

Catalog No.	Length	Weight
1055	8'	9 lbs.
Replacement Handles		
2003R	8'	7 lbs.

\*Other sizes also available.

### Curved Head Tamping Bar

Because of the curved head it is possible to get closer to the wall of the hole and closer to the pole itself. The head measures 7" wide, and 1 7/8" thick at the middle tapering to 5/8" thick at each end. The handles are of straight grained, second growth thoroughly air-seasoned hardwood.

Catalog No.	Length	Weight
3698-8	8'	12 lbs.
Replacement Handles		
3698A-8	8'	4 lbs.

\*Other sizes also available.

### Round Crow & Digging Bar

This digging bar is made of a special crucible steel of a grade equal to Black Diamond or Crescent Steel. This steel is stiff so the bar will not bend, yet it is not brittle, so it won't chip or break and cause added expense and delay for sharpening. Each bar is perfectly straight. Pictured to the right: both ends of the crow and digging bar.

Catalog No.	Diameter	Length	Weight
1062	1"	8'	21 lbs.

\* Other sizes also available.

### Straight Shovels

This shovel is tough, hard and strong, and is made to stand up under the most trying conditions. The alloy steel blade is forged to a straight-pattern and it is heat-treated in automatically controlled furnaces which eliminates the possibility of carelessness and guesswork. Handles are made of Northern White Ash or Hickory wood.

\*Other sizes also available.

Catalog No.	Length	Weight
2033	8'	9 lbs.
Replacement Handles		
1006	8'	6 lbs.

### Spoon Shovels

Two types of spoons are manufactured, the Eastern pattern and the Western pattern. These two types furnish a choice for all users.

Western Pattern

Eastern Pattern

\* Other sizes also available.

Catalog No.	Length	Weight
Western Pattern		
2024	8'	10 lbs.
Eastern Pattern		
2024E	8'	10 lbs.

\* Replacement Handles also available.

## Digging Tools

### Post-Hole Digger / Split-Handle - 2050

The digger blades are made of heavy-gauge alloy steel. Two bolts hold each handle securely to the digger head making them easy to replace when necessary. This design has a forward-back motion with wider blade opening, which allows for a larger hole to be dug.

Catalog No.	Size	Weight
2050	8'	14 lbs.
Replacement Handles		
2050A-8	8'	8 lbs.

### Post-Hole Digger / Solid-Handle - 2051

The digger blades are made of heavy-gauge alloy steel. Two bolts hold each handle securely to the digger head making them easy to replace when necessary. The diameter of the hole it produces is approximately 6". The handles begin together and are then pulled apart with a side-to-side motion to capture load.

Catalog No.	Size	Weight
2051	8'	15 lbs.
Replacement Handles		
2051A-8	8'	8 lbs.

### Skidding Tongs

These tong are made from round, high-carbon steel bar stock, which is hammer forged and heat-treated for consistent strength. These tongs have shorter pivot and ensures the hooks stay in proper alignment. Skidding Tong are intended for pulling or skidding material and are not load rated. They must be used for overhead lifting.

Catalog No.	Size	Weight	Hook
384A	1" x 16" Tong W/ Ring	8 lbs.	16"
384B	1" X 21" Tong W/ Ring	10 lbs.	21"

\* Other sizes also available.

### Cant Hooks

Made with hardwood handles and high-carbon steel hooks which are heat treated and tested. The unique hook-stop prevents the hook from falling back and damaging the wooden handle.

Catalog No.	Description / Size	Weight
199A	2-1/4" x 4'	7 lbs.
200	2-3/4" x 4'	9 lbs.
